**CC:** [REDACTED]@ripple.com>; Chris Larsen [Chris Larsen <[REDACTED]@ripple.com>]  
**Subject:** Summary of market selling and next steps  
**Attachments:** Bot Impact Analysis.xlsx

Hi all, please review the content summarizing recent large sellers and next steps that [REDACTED] and I discussed. We can schedule a call or meeting tomorrow to discuss further.

- **Seller Summary:** XRP price has experienced weakness in the past couple of weeks, but not out of line with weakness in ETH. Triggers for major sellers since last Thursday are likely the initial NYT miswording and Earthport article.
  1. [REDACTED]
    - Large unsophisticated seller sold the remaining XRP (clearing BTC/XRP order books, so damaging) out of the wallets below (originally funded by XRP II via two transactions totaling [REDACTED] XRP in 2014 and from buys from [REDACTED] as well). More than [REDACTED] XRP was sold out of these accounts in the last few days:
      - [REDACTED]
      - [REDACTED]
      - [REDACTED]
      - [REDACTED]
      - [REDACTED]
      - [REDACTED]
      - All these accounts were included in the monitoring list that I sent to compliance for implementation (after our [REDACTED] OTC strategy discussion), and they are working on full account mapping.
      - [REDACTED] is part/majority owner of [REDACTED] and full owner of [REDACTED] which we cut off sales to after issues arose with [REDACTED] was formerly [REDACTED] partner in [REDACTED] but has split off to [REDACTED]
      - [REDACTED] for the original sales to [REDACTED] only for [REDACTED]
      - There is approximately [REDACTED] XRP (from our OTC strategy discussion) being held across other accounts affiliated with [REDACTED]
      - [REDACTED] sales have been absorbed surprisingly well, and price has held in relatively.
        - [REDACTED] has been a big buyer of the [REDACTED] sales, so we are looking further into their previous activity and potential relationships.
    - 2. [REDACTED]
      - Large sophisticated net seller for the past few weeks, but purely within the constraints of their bot (responding to bids in the market). They are not taking directional views.
      - I connected with [REDACTED] to reassure them, and Chris connected with [REDACTED]
      - [REDACTED] is permitted to use XRP for non-market making purposes on a [REDACTED] vesting basis.
    - 3. Jed
      - Small unsophisticated seller for the past few days, but he is within limits.
      - Code has been pushed for his bot, so independent selling should stop in next few days.

- **Response and Next Steps**

1. Reach out to [REDACTED] if possible to understand their motivations for selling, reassure them, and push for normal trading.
  - Given the full liquidation at [REDACTED] accounts, I think we should be prepared for the same with [REDACTED] and its 2nd degree accounts worst case.
  - Who: Chris, Patrick. [REDACTED] can join if helpful.
2. Work with compliance to map all accounts for [REDACTED] and Jed.
  - Who: [REDACTED]
3. Research the relationship of [REDACTED] to [REDACTED] in case of collusion (nothing alarming at the moment).
  - Who: [REDACTED]
4. Assess when/how to reenter market (week of 4/18 ideally).
  - Once we have alignment with [REDACTED] and assuming market stabilizes, attempt to ramp back to Budget Targets (or Budget Dollar Levels)
  - Don't need to buy in market if we can more effectively address by direct conversations with large sellers.
  - Who: [REDACTED] with approval of Chris, Brad.
5. Review attached document relating to market impact of our sales, and use to inform future GSR bot strategy in coming weeks/months.
  - Assess as part of Forecast Update (opportune time to reassess bot and direct sale strategy)—with added cash, we may want to propose a more cautious approach in the 2016 forecast.
  - Who: Brad, [REDACTED] Patrick, [REDACTED]

- **GSR Bot Impact Summary (attached)**

- To inform our potential bot selling/buying strategy, I attached an analysis that shows the XRP price moves every day starting from 1/1/15 along with what % we net sold or bought that day. The correlations are as follows:
  - Price move to bot directionality/size: 0.11
  - Price move to bot buy size: 0.14
  - Price move to bot sell size: 0.023
- Conclusion: At a daily market level, our bot activity does not have a major correlation to price moves. There is a slight positive correlation (0.11) that can become more marked on days with thin liquidity and negative market sentiment (like we just had). The correlation is stronger for buys (price increases when we buy) and weaker for sales (price decreases when we sell). The buy sample set was very small, so results are not statistically significant. Overall, I would argue that the current XRP price would be higher now if we were not introducing new XRP supply daily; I also think our buys on weak days are more impactful on a daily level than sales on normal days.
